

# Creating an Ethereum Wallet

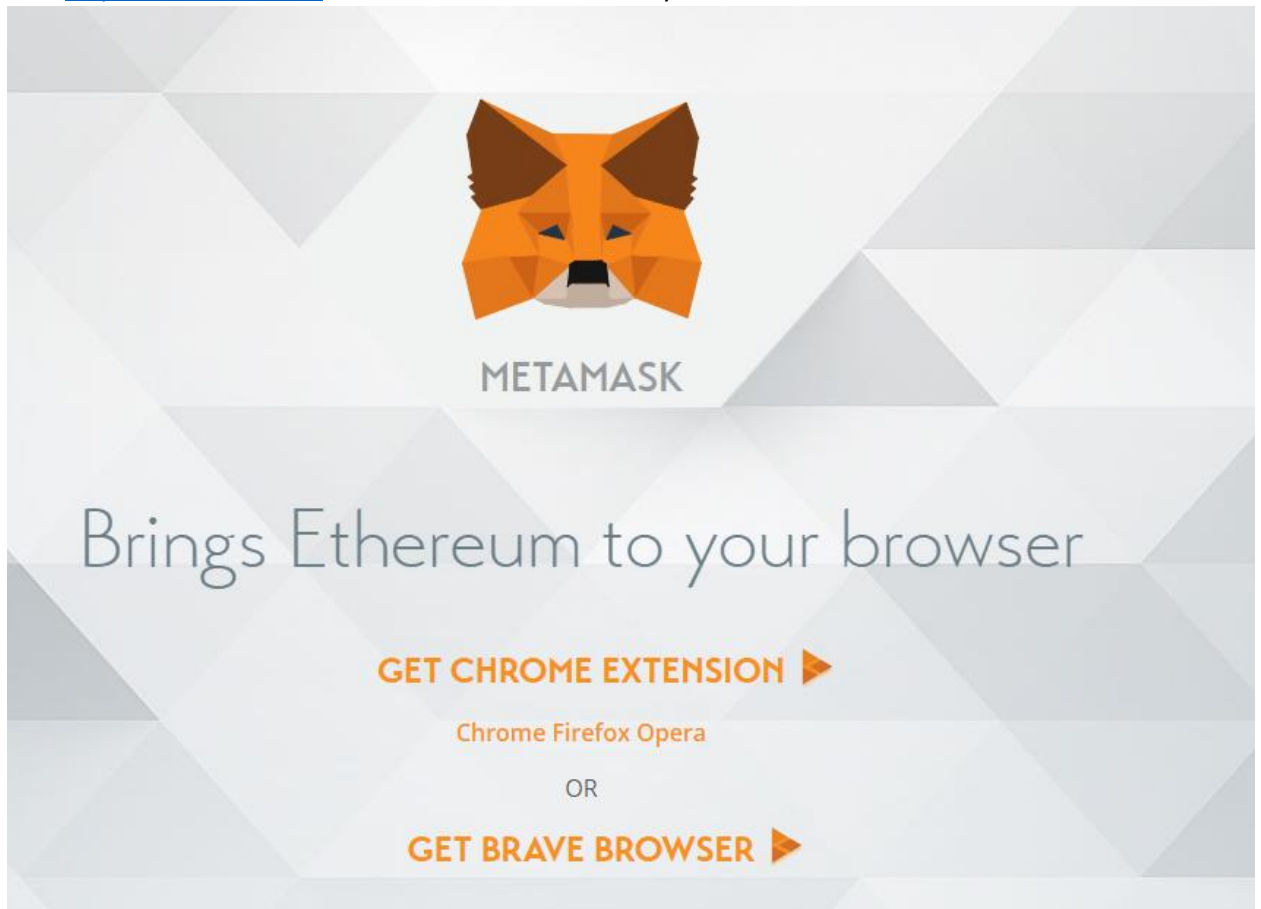

## Using MetaMask

### Why use Metamask?

Using meta mask creates a safe and simple user experience with additional safeguards without compromising control. Because MetaMask will block you with a big red warning if you visit a malicious site, It is far less likely you will be phished or affected by a phishing site while your key remains in MetaMask where the fake website will not be able to steal it. Keep in mind that MetaMask will never open itself to ask for your seed phrase, which has become an attack.

### Setting up a MetaMask Wallet.

1. Visit <https://metamask.io/> and choose which browser you would like to add MetaMask to.

2. Once MetaMask is successfully on your browser click on the fox icon in your browser's extension bar to view and accept the terms of service. You must scroll down and read the terms to enable the "Accept" button, which will turn orange when ready.

## PHISHING WARNING

WED JUN 13 2018

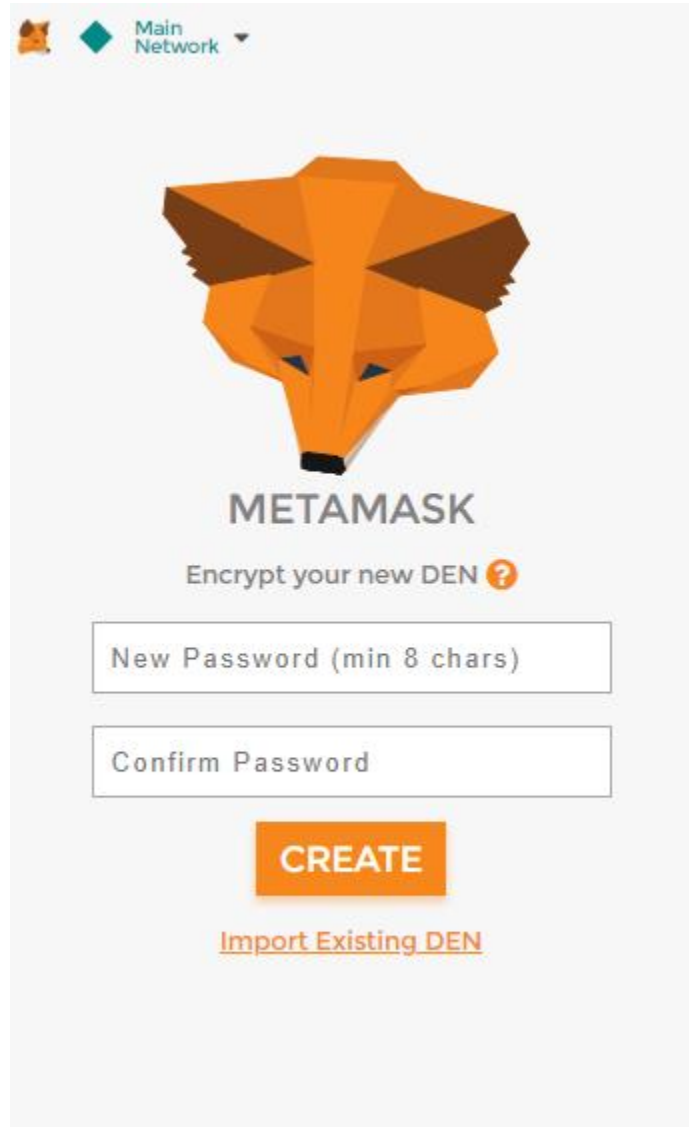

Dear MetaMask Users,

There have been several instances of high-profile legitimate websites such as BTC Manager and Games Workshop that have had their websites temporarily compromised. This involves showing a fake MetaMask window on the page asking for user's seed phrases. MetaMask will never open itself in this way and users are encouraged to report these instances immediately to either [our phishing blacklist](#) or our support email at

Accept

3. Create a wallet.

- a. Enter a password and hit “Create”. The password will be used to log into MetaMask.

The image shows the MetaMask 'Create' screen. At the top left, there is a small fox icon and a teal diamond icon next to the text 'Main Network' with a dropdown arrow. In the center is a large orange fox head logo. Below the logo, the word 'METAMASK' is written in a bold, sans-serif font. Underneath that, the text 'Encrypt your new DEN' is followed by a question mark icon. There are two input fields: the first is labeled 'New Password (min 8 chars)' and the second is labeled 'Confirm Password'. Below the input fields is a large orange button with the word 'CREATE' in white, uppercase letters. At the bottom, there is a link that says 'Import Existing DEN' in orange text.

- b. Your vault will be created and you will be shown 12 seed words that you must store and keep safe & private. This seed phrase is the only way to recover a wallet and must be kept completely safe and never shared with anyone.

## VAULT CREATED

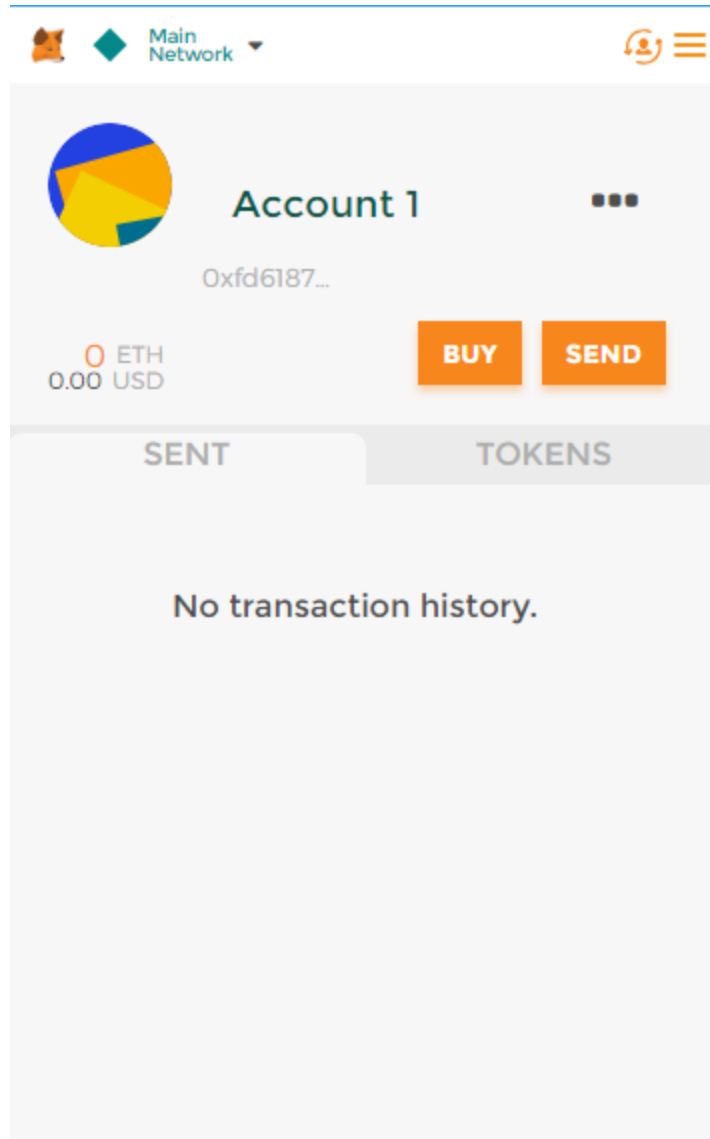

These 12 words are the only way to restore your MetaMask accounts. Save them somewhere safe and secret.

```
device ten abuse chimney  
transfer supreme bid dolphin  
awkward logic sample tray
```

I'VE COPIED IT SOMEWHERE SAFE

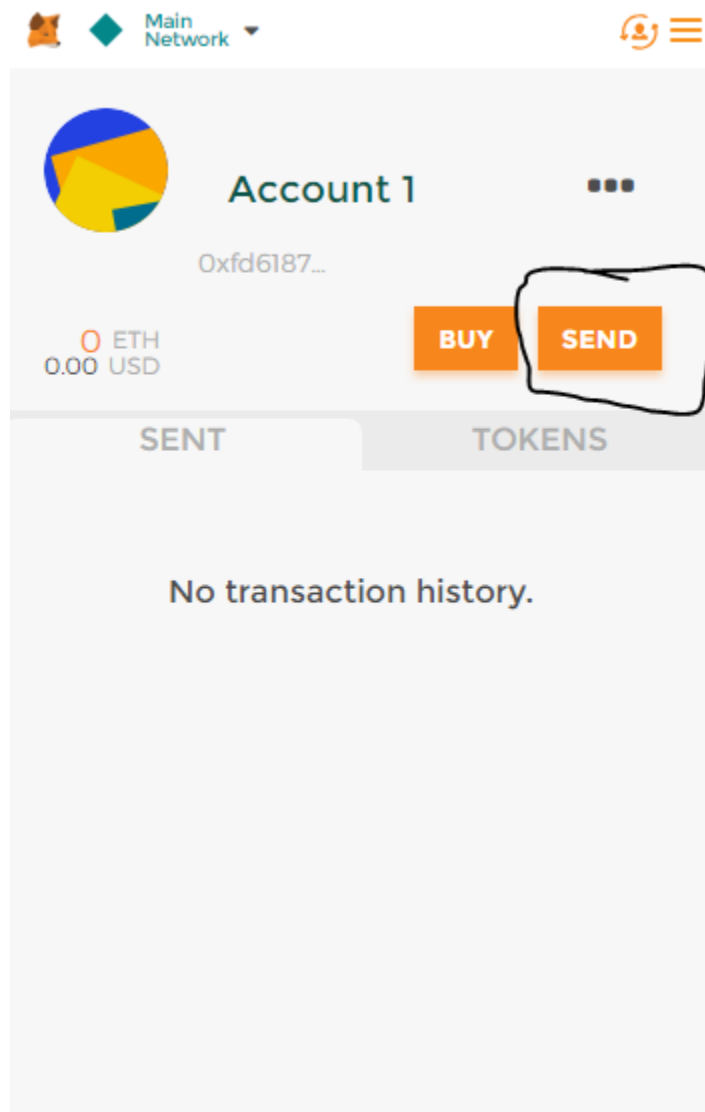

SAVE SEED WORDS AS FILE

- c. Once you have copied the seed words and continue, you will be shown your wallets dashboard.

- d. To contribute to the token sale, visit <https://kryptopal.io/register/> and create an account. Once you hit register you will be taken to a page where you can copy the ETH address and find directions to complete your contribution to the sale.

- e. In your MetaMask Dashboard, click “Send”

- f. Paste the address into the “Recipient Address” input field and enter the amount to contribute into the “Amount Field” and hit “NEXT”.
